

DVR Trigger Harness for DVR-50 & DVR-150 range

Multi-Pin Trigger Harness with bare ends that connects Trigger Inputs and Outputs to DVR-50 & DVR-150 range of solutions.

The DVR-50-TH adds the following to the DVR-50 & DVR-150 range:

- ▶ 8 x Configurable Trigger Inputs for External Inputs
- ▶ RS232 Serial Output
- ▶ Speed Pulse Output
- ▶ External Mic Output

Trigger IN: 1-8 can be a high or low trigger value which is configured in the menu of the DVR

Trigger OUT: 1-2 can be used to trigger external devices (such as a telematics device) when any trigger input is activated. This is again configurable in the DVR-350 menu.

Speed Input: Can be used to record speed information of the vehicle onto the recording captured on the DVR-350. It should be connected to the analogue speed output wire on the vehicle (often found behind the radio or instrument cluster).

RS232: Can be used to send and receive data from external devices.

The external mic input can be used to record separate audio to that of the mic normally housed in the cameras.
